PROFILE

Aspiring Electrical and Computer Engineer passionate about embedded systems, IoT, and software development. Skilled in designing efficient hardware-software integrated solutions for automation and control.

EDUCATION

APJ Abdul Kalam Technological University

B.Tech in Electrical and Computer Engineering

Expected May 2026

CGPA: 7.01 / 10.0

Coursework: Electrical Machines, Power Electronics, Embedded Systems, Control Systems, Data Structures, Computer Networks, IoT, Analog & Digital Circuits.

INTERNSHIPS

Virtuosoft Technologies Private Limited

Frontend Developer Intern (React.js)

Dec 2025 – Ongoing

Technopark, Thiruvananthapuram, Kerala

Worked as a Frontend Developer using React.js for a Loan Management System project.

Developed responsive UI components and integrated frontend modules with backend APIs.

Collaborated with the development team to improve user experience and application performance over a 6-month internship period.

Keltron

Python Intern

1 Week Internship

Kerala

Completed a short-term internship focused on Python programming fundamentals and application development.

Worked on basic Python scripting, problem-solving, and mini project tasks during the internship.

TECHNICAL SKILLS

Programming & Embedded: C, Python, Embedded C, Java, SQL, Arduino IDE, ESP-IDF

Hardware & Circuit Design: PCB Design (EasyEDA), Circuit Simulation (Proteus, Tinkercad), Relays, Sensors, Power Electronics

IoT & Wireless Communication: ESP32, ESP-NOW, Wi-Fi, Blynk IoT, MQTT

Software Frameworks: React.js, Spring Boot

Developer Tools: Git, VS Code

Operating Systems: Windows, Linux

PROJECTS

Smart Irrigation System using ESP32 and IoT

[Link](#)

Tech Stack: ESP32-WROOM-32E, ESP-NOW, Blynk IoT, Soil Moisture Sensor, DHT11, Relay, Water Pump.

Designed a wireless network of soil sensor nodes communicating with a parent ESP32 using ESP-NOW.

Automated pump operation based on real-time soil moisture and temperature readings.

Enabled live data monitoring and manual control through Blynk IoT dashboard.

ApplyTrack - Internship Application Tracker

[Link](#)

Tech Stack: React.js, Spring Boot, REST API, PostgreSQL/MySQL

Developed a Kanban-style dashboard in React.js to manage internship applications visually.

Created RESTful APIs using Spring Boot to handle backend operations and data management.

Implemented database schema for structured storage and real-time CRUD operations.

TaskMaster - Java To-Do List App

[Link](#)

Tech Stack: Java, Swing, SQL, JDBC

Developed a desktop application for efficient task tracking with CRUD functionalities.

Used JDBC for persistent SQL-based data storage and retrieval.

AREAS OF INTEREST

Embedded Systems and IoT Development

Automation and Control Systems

Power Electronics and Renewable Energy

Software Development and Full-Stack Applications
